

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of claims:

1. (currently amended) A studless tire, wherein glass fibers or carbon fibers having an average fiber diameter of 1 to 100  $\mu\text{m}$  and an average length of 0.1 to 5 mm are dispersed in a diene rubber of a tread in an amount of 3 to 20 parts by weight based on 100 parts by weight of the diene rubber in such a way that the glass fibers or carbon fibers are oriented in a thickness direction of a the tread, a complex elastic modulus  $E_1$  of the tread in the thickness direction of the tread and an elastic ~~module~~ modulus  $E_2$  of the tread in a circumferential direction of the tire measured at 25°C satisfy the equation  $1.1 \leq E_1/E_2 \leq 4$ , and hardness of the tread rubber measured at -10°C is 45 to 75 degrees.

2-4. (Canceled).

5. (currently amended) The studless tire according to claim 1, wherein ~~the tire has a tread that~~ said tread is made by rolling a specified rubber composition by a calendar roll to generate a sheet and repeatedly folding the sheet.
